## CHECK OUT WHAT'S GOING ON AROUND THE WEBB!

Mrs. Isabel's elementary class participated in a math and science activity using melted crayon art. The students created their own art masterpiece by melting crayons with a hair dryer. The Unique Curriculum unit for the month of January is all about Physical Science. The students saw how heat from the hair dryer made the crayons melt. The melted crayon wax dripped down on the paper and created a unique piece of art! Mrs. Isabel's class did a great job observing and discussing the physical changes that took place.
